

To the Hiring Manager,

I am applying for the Backend Developer position at DevCo. With a strong background in Node.js, Express, and MongoDB, I have successfully built and maintained scalable server-side applications.

In my most recent role at WebDev Solutions, I worked closely with the frontend team to integrate APIs and ensure seamless communication between the server and the client. I am enthusiastic about the opportunity to work at DevCo, where I can continue to apply my backend development skills and help build innovative products.

Looking forward to discussing how my skills align with your needs.

Sincerely,tula
